

RAVALI KETHIRI

Senior Full Stack Java Developer

Dallas, TX | 469-750-9774 | k.ravali011@gmail.com | [linkedin.com/in/ravali-kethiri](https://www.linkedin.com/in/ravali-kethiri)

PROFESSIONAL SUMMARY

- Senior Full Stack Java Developer with 9+ years of experience designing, building, deploying, and supporting enterprise web applications for healthcare and financial services organizations.
- Strong back-end expertise in Java 11 and Java 8, including Lambda/Streams, multithreading and concurrency, using Spring Boot, Spring MVC, Spring Security, and Hibernate/JPA to build RESTful and GraphQL microservices.
- Strong front-end expertise in Angular (versions 7–20) and React, building responsive user interfaces with JavaScript, HTML5, CSS3, and Bootstrap that consume REST APIs.
- Experienced in designing and maintaining CI/CD pipelines with Jenkins, Maven, and Gradle to automate build, test, and deployment of full-stack applications across Dev, QA, Staging, and Production.
- Hands-on DevOps experience containerizing applications with Docker and deploying and orchestrating them on Kubernetes/OpenShift and Pivotal Cloud Foundry (PCF).
- Practical AWS experience with EC2, S3, Elastic Beanstalk, SQS/SNS, IAM, CloudWatch, and Auto Scaling, plus Azure high-availability deployments; AWS Certified Solutions Architect – Associate.
- Skilled in application deployment and server administration on Apache Tomcat, WebSphere, JBoss, and WebLogic on Linux, including SSL certificate management and performance troubleshooting.
- Experienced with Oracle, PostgreSQL, MongoDB, and Cassandra, and with modernizing legacy Struts/JSP applications to Spring MVC and Angular.
- Oracle Certified Java SE 8 Programmer; comfortable owning a feature end to end, from requirements analysis and development through automated deployment, monitoring, testing, and Level 1–3 production support in Agile/Scrum teams.

TECHNICAL SKILLS

Languages	Java 11, Java 8 (also 7/6), PL/SQL, SQL, Python, PHP
Java Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Batch, Spring Data JPA, Spring AOP/IOC, Hibernate 3/4, Dropwizard, Jersey, Struts 1/2, JSF, MyBatis
Front End	Angular (7–20), React, Node.js, Express.js, AngularJS, JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap, JSON, XML/XSLT
AWS Cloud	EC2, S3, Elastic Beanstalk, SQS/SNS, IAM, CloudWatch, Auto Scaling; AWS Certified Solutions Architect – Associate
CI/CD & Build Tools	Jenkins (pipeline design and automation), Maven, Gradle, ANT, Git, Bitbucket, SVN, Clover, Cruise Control
DevOps & Deployment	Docker, Kubernetes, OpenShift, Pivotal Cloud Foundry (PCF), Azure, Linux, SSL certificate administration, Dev/QA/Staging/Production release management
Web Services & Messaging	REST, GraphQL, SOAP, WSDL, JAX-WS/RS/RPC, JAXB, Apache Axis, Kafka, ActiveMQ, RabbitMQ (JMS)
Databases	Oracle (incl. TimesTen), PostgreSQL, SQL Server, MySQL, DB2, MongoDB, Cassandra
App/Web Servers	Apache Tomcat, JBoss, IBM WebSphere, WebLogic
Monitoring & Support	AWS CloudWatch, Log4j, Level 1–3 production support, incident triage and root-cause analysis
Testing & Practices	JUnit, TestNG, Selenium, TDD, Agile/Scrum, JIRA, Confluence, code reviews, GitHub Copilot

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Oracle Certified Java SE 8 Programmer – Associate
- Artificial Intelligence & Machine Learning Certified

PROFESSIONAL EXPERIENCE

Sr. Full Stack Java Developer Jan 2021 – September 2026

North Carolina Department of Health and Human Services (DHHS), Raleigh, NC (Remote)

- Built and maintained Jenkins CI/CD pipelines with Maven to automate build, test, and deployment of Java/Spring Boot services across Dev, QA, Staging, and Production environments.
- Containerized applications with Docker and deployed and orchestrated the services on OpenShift/Kubernetes.
- Provisioned and managed AWS infrastructure including EC2, S3, SQS, Elastic Beanstalk, CloudWatch, and Auto Scaling, and supported Azure high-availability deployments.
- Designed and developed full-stack modules on Java 11 and Java 8 using Spring Boot, Spring MVC, Spring Security, and Hibernate ORM, exposing REST APIs consumed by Angular (7–20) and React front ends.
- Developed responsive React front ends (functional components, Hooks, Context/Redux, React Router) for healthcare portals, building reusable component libraries and form workflows that consume Spring Boot and Node.js REST and GraphQL APIs.
- Built Node.js/Express.js services as a backend-for-frontend (BFF) layer that aggregates data from Java microservices, handles token-based authentication, and exposes REST endpoints optimized for React clients.
- Wrote unit and integration tests with Jest and React Testing Library for React components and Node.js services, and containerized Node.js apps with Docker for Jenkins-driven deployments to OpenShift.
- Built and deployed RESTful microservices with Spring Boot and Dropwizard, including a forum-style feature supporting image uploads and threaded comments.
- Applied Java 8 Lambda/Streams and Java 11 I/O APIs, and used multithreading and concurrency for asynchronous email generation.

- Modernized legacy Struts/JSP modules by migrating the presentation tier to Spring MVC and Angular while preserving existing business logic.
- Integrated GraphQL schemas, queries, and mutations for flexible client-data access across MongoDB and other data stores.
- Configured Oracle TimesTen in-memory database to accelerate high-frequency queries and tuned PL/SQL and SQL for production performance issues.
- Managed Cassandra cluster topology, node scaling, and CQL query/index tuning, and administered PostgreSQL across Dev, QA, Staging, and Production.
- Implemented LDAP-based single sign-on and PKI/digital-certificate authentication across web applications firm-wide.
- Wrote automated tests with TestNG and built a custom tool to compare query results across two data sources for data-quality validation.
- Served as subject-matter expert for client data onboarding, advising on financial-domain reference-data strategy and client review workflows.
- Provided Level 1–3 production support for healthcare and financial applications, triaging incidents and coordinating fixes with development teams.
- Used GitHub Copilot in Visual Studio to accelerate React front-end development, generate unit tests, and speed up code reviews and documentation.

Environment: Java 11, Java 8, Spring Boot, Spring MVC, Hibernate, Jenkins, Maven, Docker, OpenShift, Kubernetes, AWS, Azure, Angular, React, Node.js, Express.js, Jest, GraphQL, Oracle TimesTen, Oracle 11g, PostgreSQL, Cassandra, MongoDB, GitHub Copilot.

Sr. Full Stack Java Developer(remote) **Jan 2020 – Dec 2020**
SVB Financial Group, California

- Built REST microservices with Spring Boot and deployed them on Pivotal Cloud Foundry (PCF); developed backend services using Java 8 APIs.
- Managed AWS IAM permissions and infrastructure across EC2, S3, Elastic Beanstalk, and CloudWatch.
- Administered SSL certificates and Apache Tomcat/WebSphere on Linux, partnering with DBA and network teams to resolve performance issues.
- Applied Test-Driven Development validated with Clover and Cruise Control continuous-integration tooling.
- Implemented asynchronous messaging with ActiveMQ and RabbitMQ (JMS) and used Log4j for application monitoring.
- Implemented Spring MVC/AOP-based security and business logic, with Hibernate/HQL for data access and Spring JDBC Template for direct SQL.
- Migrated Struts/JSP login and access-control modules to a Spring-based architecture and developed reusable custom JSP tags.
- Designed OR-mapping for one-to-one and many-to-one Oracle table relationships.
- Used AngularJS and React controllers to update entity models against a task-management database.
- Analyzed business requirements and produced high-level designs within an Agile/Scrum process, participating in sprint planning and daily stand-ups.
- Participated in code reviews and contributed to the team's best-practices documentation.

Environment: Java 8, Spring MVC/AOP/IOC/Boot, Hibernate, Jersey REST, Pivotal Cloud Foundry, OpenShift, AWS (EC2, S3, Elastic Beanstalk, IAM, CloudWatch), WebLogic, Tomcat, Oracle 11g, Elastic Search, NoSQL, ActiveMQ, RabbitMQ, SVN.

Java Developer **May 2017 – Aug 2019**
W3Sofittech, Hyderabad, India

- Deployed applications to Apache Tomcat across QA and production environments, using SVN for version control and release management.
- Developed JSP/Servlet-based modules in a Waterfall SDLC, integrating Java APIs with jQuery, AJAX, and JSON for client-server communication.
- Built the front end using Struts 2 (MVC), JavaScript, HTML, and CSS, including server-side pagination for large data sets.
- Implemented persistence with Hibernate ORM against Oracle, writing SQL queries and stored procedures.
- Wrote Struts action/form classes, configured struts-config.xml, and integrated Struts and Hibernate with Spring for business logic.
- Conducted unit, integration, system, and user-acceptance testing and tracked defects in JIRA.

Environment: Java, J2EE, Spring, Hibernate, Struts, JSP/Servlets, Tomcat, Oracle, SVN, JIRA, JavaScript, jQuery, JSON, AJAX, Eclipse.

EDUCATION

Post Graduate Program in Artificial Intelligence & Machine Learning
The University of Texas at Austin, Austin, TX

Bachelor of Science, Computer Science and Engineering **2016**
Jawaharlal Nehru Technological University, India
